

GP-510

■ FEATURES

By changing the tip it can be used as a burner or a hot knife.
 The temperature can be controlled just like a soldering iron from 15 to 75W by the temperature adjustment knob.
 It uses standard quality butane lighter gas.

■ SPECIFICATIONS

MODEL	PORTASOL PRO PIEZO GP-510
System	Gas heating system
Length	175 mm (not including the cap)
Weight	65g (not including the cap)
Maximum Temperature Output	580°C (Soldering iron) , 1300°C (Blow Torch)
Refill Time (Typical)	Approximately 30 sec.
Ignition System	Piezo electricity ignition system
Gas Type	Butane
Operation Time Per Refill	Approximately 45minutes (for soldering)
