

FEIN MULTIMASTER

**MSx 315
MSx 636 II
MSxe 636 II**

MULTIMASTER renovation system.

Powered by innovation

Select your MULTIMASTER package.

To ensure that you get the most out of your FEIN MULTIMASTER, this power tool is now available in different versions with various extensive equipment and accessories: START, SELECT, TOP and TOP-EXTRA. With the exception of the START package, all MULTIMASTERS are equipped with electronic speed control. The electronics increase user comfort during filigree work in model building and teak panelled deck repairs, for example. Whichever MULTIMASTER you decided upon, the price class of all packages boasts an excellent price-performance ratio. The entire range of accessories can of course be ordered individually and used in all versions.

START – the basic model.

The START set contains the most important accessories for accomplishing the most common tasks: sanding, scraping and sawing.

The START MULTIMASTER provides you with an extremely smooth-running professional delta sander for maximum sanding capacity, with a powerful scraper and with an oscillating saw.

SELECT – with added value.

The SELECT package includes the MULTIMASTER MSxe 636 II with electronics as well as two additional saw blades:

1 HSS segment saw blade for wood, putty or soft materials, for fibreglass, carbon fibre-reinforced plastic and sheet metal to 1 mm; 1 carbide-tipped segment saw blade for cutting out tile joints. This considerably broadens the FEIN MULTIMASTER's range of applications.

At a glance

- Saw, sand, scrape, separate, rasp, polish, cut, compact cement and many other tasks like a professional with just one single machine.
- Optimum handling thanks to ergonomic design and low weight.
- Extensive range of accessories available.

START contents.

1 MULTIMASTER MSx 636 II; 1 sanding pad; 5 of each type of sanding sheet, grain 60, 80, 120 and 180; 1 rigid stopping knife; 1 E-Cut saw blade, 35 mm; 1 key; mounting bolts.

Order reference 7 229 26 00

SELECT contents.

1 MULTIMASTER MSxe 636 II II with electronics; 1 sanding pad; 5 of each type of sanding sheet, grain 60, 80, 120 and 180; 1 rigid stopping knife; 1 E-Cut saw blade, 35 mm; 1 HSS segment saw blade; 1 carbide segment saw blade; 1 key; mounting bolts.

Order reference 7 229 27 50

TOP – the full works.

The additional carbide rasp can be used for sanding down tile adhesive, on natural and artificial stone, for removing graffiti from concrete and stone facades, for coarse sanding wood, etc. Plus, exclusive to the TOP package: the MINICUT & Diamond sharpening set with matching saw blades as well as everything you need to ensure dust-free working. In a sturdy metal carrying case.

TOP EXTRA – the combo package.

A first-class offer: the FEIN MULTIMASTER TOP and the dust extractor Dustex II in one package. The Dustex II puts forth an extremely high-performance and is also comfortable. With extensive basic accessories, automatic switch-on and with the possibility for wet and dry conditions. TOP EXTRA is the first choice for perfectionists who value a maximum of application options. Take advantage of immense savings by buying the package as opposed to the individual devices.

Top contents.

1 MULTIMASTER MSxe 636 II with electronics, in metal carrying case and containing the SELECT equipment plus: 1 perforated carbide rasp; 1 MINICUT & Diamond sharpening set; 1 perforated sanding pad; 5 of each type of sanding sheet, perforated, grain 60, 80, 120 and 180; 1 suction device.

MULTIMASTER MSxe 636 II, as included in the SELECT, TOP, and TOP EXTRA sets:

Power input	180 Watts
Sanding pad oscillations	12 000 – 21 000/min*
Cable with plug	5 m
Weight	1.1 kg
Sanding pad above corner	80 mm
*MSx 636 II (as included in the START set) without electronics with 21 000/min	

All-round suitability.

A leap ahead through technical innovation.

During the oscillating action, each accessory you fit moves with a frequency of up to 21 000/min along a minimal arc of 3.2 angular degrees. This method of functioning provides unrivalled versatility with unique advantages.

- Work without kick-back into the smallest corners and on edges.
- High sanding capacity with virtually no pressure force required.
- Perfectly smooth running; the tool does not move on its own.
- Extremely versatile compared with competitive products through universal suitability for a wealth of applications.
- Very safe to handle.

For professionals and DIY hobbyists.

Its astonishing suitability for a wealth of different applications makes the FEIN MULTIMASTER one of the most versatile and therefore most sensible special tools on the market. Any application will produce professional results:

for renovating all around the house (windows, floor coverings, interior fittings, furniture, tiles, etc.), for car repairs, boat maintenance and model building.

Work without mains.

The battery-operated FEIN MULTIMASTER accu offers all the versatility of the FEIN MULTIMASTER. The 800-mAh rechargeable batteries are designed to ensure a long life, and the highly efficient mechanics of the appliance guarantee the same performance as the mains-operated version.

Price includes:

1 sanding pad; 5 of each type of sanding sheet, grain 60, 80, 120 and 180; 1 HSS segment saw blade; 1 rigid stopping knife; 1 rechargeable battery (800 mAh); 1 charger (one-hour charger); 1 key; mounting bolts.

MULTIMASTER news.

The MULTIMASTER programme is continuously complemented through new, innovative accessories. The new versatile universal E-Cut saw blade extends the selection.

The application possibilities of the MULTIMASTER are thereby ideally complemented.

One for all.

You are well equipped in any situation with the new universal E-Cut saw blade.

Use this saw blade to cut through hard- and softwood up to about 60mm cutting depth, non-ferrous metal, steel sheets, and pipes up to about 1.5 mm thickness, as well as nearly all plastics, plasterboard, and fibreglass.

The cropping of the saw blade makes it also possible to remove heating installations that are flush to the wall.

Even nails pose no problem for the robust teeth (bimetal). This makes the universal E-Cut saw blade especially suited for efficient use on construction sites.

Window renovation made easy.

When renovating your windows, the FEIN MULTI MASTER ensures perfect results and helps you save on costs, too. Sand well-maintained windows with a grain of 40 – 80. After this, smooth the surface in one go with grain 120 – 180. The enormous sanding capacity rapidly provides visible results. It's a good idea to sand as carefully as possible, to obtain a perfect appearance and

long-lasting results. For windows with flaking paint, damaged wood surfaces or worse-for-wear puttied edges, enjoy the benefits of the carbide rasp with a sanding capacity five times greater than grain 40.

Sanding windows.

Perfectly sanded surfaces with sanding sheets of grain 36 to 400.

Sanding sheet set

Includes: 10 of each type of sanding sheet with Velcro rapid attachment, grain 60, 80, 120, 180, 240.

The perfect tool for working on floor coverings.

The FEIN MULTIMASTER provides an excellent service when removing old floor coverings and laying or renovating parquet flooring. Carpets, foam rubber, PVC or linoleum flooring can be removed more easily if it is first cut into strips. The FEIN MULTIMASTER with segment blade saves you a great deal of time and effort, compared with working with a carpet knife. And you can remove floor covering remains, bonding agent, tile adhesive or thick old paint effortlessly using the rigid stopping knife blade. Cement, concrete and stubborn remains are removed swiftly with the carbide rasp. For parquet floors, the delta sander element of the FEIN MULTIMASTER provides the ideal addition to a parquet sanding machine, as it gets into corners and edges. And with the appropriate saw blades, you can cut the parquet precisely to shape or trim wooden door frames.

Removing old adhesive.

Residual carpet and tile adhesive, scale, underseal and damaged coatings are easily removed with the rigid stopping knife.

Rigid stopping knife

Saving time for interior fitters.

The MULTIMASTER greatly simplifies all repair and installation work. Plasterboard, wood, plastic and many other materials can be cut or pieces cut out of them with ease either before or after their assembly. A unique feature: the E-Cut saw blades. They allow precise and quick sawing, even in angles and corners. In especially small cutouts, use the MINICUT & Diamond sharpening set saw blades. For concave and convex surfaces, the profile sanding set enables you to achieve a top-quality sanding capacity. Sand down excess plaster stucco, cement or filler in no time with the carbide rasp.

Cutting cable ducts.

For sawing wood, putty and soft materials. HSS saw blades also for fibreglass, carbon fibre-reinforced plastic and sheet metal up to 1 mm. Cropped saw blades enable you to work flush to the surface. The segment blades allow you to cut at right angles without overcutting.

HSS segment saw blade

Professional assembly and restoration of furniture.

The FEIN MULTI MASTER is an excellent helper for assembling fitted furniture and kitchens, for the E-Cut saw blades provide easy access to every spot. You want to make recesses in ready-fit cupboards? No problem. You don't have to spend time taking them down.

Now the FEIN MULTI MASTER gets quickly down to the job in repairing furniture and restoring antiques, too. Concave and convex surfaces can be finished easily and quickly with the profile sanding set.

Profile sanding.

Six replaceable profiles of the profile sanding set enable you to sand cramped spaces, in grooves and on profiles – completely comfortable and with 300% improvement in sanding capacity. The flexible hollow sections perfectly adapt to various conditions.

Profile sanding set

For fine sanding work in cramped spaces, in grooves and on profiles. High sanding capacity, faster and simpler exchanging of profiles and sanding disks. Complete set includes 1 holder and 6 different profiles: 1 V-form for 90° angle, 1 trapezium form for tongue-and-groove connections, 1 for straight profiles, 1 convex form (large), 1 concave and 1 convex form (small) each as well as 5 of each type of sanding sheet, grain 80, 120 and 180.

Replacing tiles – the easy way.

Both the diamond saw blades and the tungsten coated segment saw blades are among the most coveted items in the accessory range of the FEIN MULTIMASTER. They will help you to replace damaged wall or floor tiles rapidly and without difficulty. The joints can be cut out with a minimum amount of dust. There is virtually no likelihood whatsoever of damaging neighbouring tiles. Remove the old tile adhesive with the carbide rasp or with the blade of the stopping knife. Diamond or carbide tools are also perfect for interior fittings to make grooves for cable ducts, e.g. in plaster, pumice or aerated concrete stone.

Removing tiles.

Use the diamond saw blade to cut out marble and concrete trass joints as well as to make grooves in plastered walls, dry wall, sheet rock, porous concrete.

Clear the decks.

Professional boat builders and proud boat owners will find their work made considerably easier with FEIN tools. With the HSS saw blades, the FEIN MULTIMASTER cuts through all common boat materials such as wood and fibreglass and carbon fibre-reinforced plastic. The FEIN E-Cut saw blades cut through wood and fibreglass-reinforced plastic at high speed. Their special shape makes them ideal for those inaccessible places. An when space is particularly tight, the MINICUT & Diamond sharpening set saw blades will do the trick. Our range for above and below the deck is completed by the cutter blade for panelled deck sealing materials.

Cutting out marine glue and polyurethane.

The cutter blade ideal for rapid and secure cutting out of panelled deck sealing materials is also suitable for problem areas such as cabins, rails, gunwales, cleats and curves.

The FEIN MULTIMASTER features very special capabilities. This is evident in the way the HSS saw blades cut precisely through body panel sheet metal or plastic parts. The cutting lines – a mere 0.5 mm wide – are free from burrs and distortions and do not produce flying sparks. The saw can be plunged into the material to be cut at any point in the body with no preparatory work.

If necessary, you can determine the cutting depth using a depth stop ring. And the FEIN MULTIMASTER offers neat work not just with sawing, but also for sanding. In addition, you can use the rigid stopping knife blade to scrape off underseal before carrying out welding tasks. Please turn to pages 17 to 20 for further items in our extensive range of accessories.

Polishing car parts to a bright shine.

Sharpening.

The additional clamping plate, with a 15° sharpening angle, now also enables you to fit diamond files into the MINICUT holder. This enables you to evenly sharpen knives, tools, garden implements and much more.

MINICUT & Diamond sharpening set

1 saw blade holder, 2 saw blades (10 and 20 mm wide) for wood and other soft working materials, 2 HSS saw blades (10 and 20 mm wide) for non-ferrous metals and plastic, 1 normal diamond file, 1 clamping plate 15°.

Order reference **6 39 01 025 03 5**

Completely dust-free sanding.

Now you can avoid health risks when sanding down paint and lacquer. The dust remover for the FEIN MULTIMASTER allows you to breathe freely. The dust is directly extracted through the perforated sanding sheet and additional holes in the sanding pad. The result: work virtually dust-free, with no annoying dust residues left behind. And an additional secondary benefit of this system is the longer service life of the sanding sheets.

Dust bites the dust: FEIN „Dustex II“.

The ideal addition to the FEIN MULTIMASTER. Suitable for all accessories with vacuuming function. The Dustex II is even more powerful and user-friendly! With a socket on the device, automatic on/off, 5 guide rolls for unlimited freedom of movement, extensive basic equipment and the option of being used in wet or dry conditions, it is perfectly suited for tasks in your workshop, on your car and for your hobby.

Order reference 6 37 17 109 03 5

Filter paper for Dustex II

Pack of 5

Order reference 3 13 22 781 01 7

Polishing.

Set of felt polishing pads

For polishing metal parts, e.g. door and furniture fittings made of brass, etc., as well as for polishing and decorative polishing of stone and stone products. Gelcoat layers on boats can also be polished. Pack of 2.

Order reference 6 38 06 140 02 7

Polishing agents for various materials are available from qualified stockists.

Scraping.

Rigid stopping knife

For removing residual carpet and tile adhesive, scale, underseal, damaged coatings, etc.

Order reference 6 39 03 178 01 7

Flexible stopping knife

For removing old paint, residual adhesive, stickers, elastic sealants from bathrooms and living quarters etc.

Order reference 6 39 03 165 01 3

Cutting.

Segment blade "Concave"

For cutting soft materials such as felt, leather and polystyrene.

Order reference 6 39 03 193 01 8

Segment blade "Convex"

For cutting rigid materials such as floor panels of plastic, linoleum, rubber, cardboard, leather, woven wire cloth, looped fabric/carpet, and much more.

Order reference 6 39 03 192 01 4

Cutting out.

Carbide-tipped segment saw blade

For cutting through marble and concrete trass joints. Cropped saw blades enable you to work flush to the surface. The segment blades allow you to cut at right angles without overcutting.

Ø 63 mm.

Order reference 6 35 02 118 01 6

Diamond saw blade

For cutting through marble and concrete trass joints for small-scale repair of tiled surfaces in interiors and bathrooms, minimal dust generation and no risk of damage to neighbouring tiles; also suitable for cutting grooves in plaster, bricks, pumice stone, honeycomb stone and aerated concrete for installing electrical wiring. Diamond coating ensures a long life. Also suitable for use with very old and hard sealant materials.

Ø 63 mm.

Order reference 6 35 02 105 01 2

Diamond segment saw blade

For cutting through marble and concrete trass joints in corners without overcutting. Cropped shape also permits work flush to the surface.

Order reference 6 35 02 114 01 7

Cleaning block

Rhombo for cleaning of carbide and diamond tools.

Order reference 6 37 19 007 01 0

Panelled deck repairs.

Cutter blade

For cutting out panelled deck sealant materials rapidly and safely. Also for problem areas such as cabins, rails, gunwales, cleats and curves.

Blade width

3 mm

4 mm

5 mm
